ABOUT ME

My main objective is to become a specialist in front-end development using JavaScript and ReactJs as main stack. I'm cooperative and enjoy sharing knowledge, usually I'm proactive to improve my hard and soft skills by myself. I want to achieve my full potential on delivering high quality solutions that will impact and add value to clients.

PROJECTS

[01/09/2022 – Current] Intern Operation Portal

Worked with the development of new functionalities for the intern portal such as adding features to split and join an operation, a new way to make financial operations to calculate amortization values, fees and installments and exporting the result to PDF and excel. The main challenge was to make a custom table with heavy business logic integrated with a form with many options and use cases.

Technologies: ReactJs, Material UI 5, React Query, Redux, Typescript, JavaScript, React Hook Form, Jest, Storybook, HTML and CSS

[01/01/2022 – 30/10/2022] Internet Banking

Write here the description. Worked with the development of a home banking portal for the final users according to the design system and with features that increase the speed requests and creation of operations, which increased the productivity of operations in more than 20%. My main responsibility was to develop the UI's according to design files and integrate with the Rest API. I developed a private NPM library to host all sharable documented components used by 3 teams of developers in different projects.

Technologies: ReactJs, Material UI 5, React Query, Redux, Typescript, JavaScript, React Hook Form, Jest, Storybook, HTML and CSS.

[21/04/2021 – 31/12/2021] Intern Prospecting Portal

Write here the description. Project with emphasis in web development using several technologies such as ReactJs, Redux and React Hook Form. The architecture used was micro front-end. The mission was to make a portal for creating a flow of prospecting the customers from the company. I worked developing many forms workflows, graphs, tables and customs components to improve usability and productivity for the users. Work with integrations with Rest APIs.

Technologies: ReactJs, Material UI 4, React Query, Redux, Typescript, JavaScript, React Hook Form, HTML and CSS, Micro frontend.

[01/10/2020 – 30/03/2021] **Video Streaming Room**

Write here the description. Project with emphasis in full-stack web development using Node.js and ReactJs, the application I was developing was about video streaming and enabling the users to watch content simultaneously from content creators, so they would be able to also monetize with live stream shopping.

Technologies: ReactJs, Redux, Typescript, JavaScript, WebRTC, HTML and CSS.

WORK EXPERIENCE

[01/04/2021 – Current]

Frontend ReactJs Developer

7Comm / Multiplica

City: São Paulo

Country: Brazil

- Help with the frontend architecture.
- Implementing micro frontend architecture on prospecting portal.
- Coaching a Junior into the prospecting portal project.
- Developing components with ReactJs, React Hooks, Material UI and Typescript.
- Managing client-side state with Redux.
- Developing Tables, Graphs and Wizard Forms.
- Managing server-side state with React Query.
- Relations with the end client.
- Developing a Chat bot.
- Developing a private NPM library to share components and functions between projects.
- Documenting components with Storybook.
- Giving support for production bugs.
- Integrating UI with Rest API's.
- Exporting tables to Excel and PDF.
- Developing custom components with high business logic and calculations.
- Improving performance of application.

[01/10/2020 – 01/04/2021]

Frontend ReactJs Developer

Paxico Technologies / Maestro

City: Los Angeles

Country: United States

- Developing video streaming on browsers simultaneously.
- Support on Node.js backend.
- Developing UI's for the website with ReactJs, Redux and Styled Components.
- Developing crud Rest API's with express and MongoDB.

LANGUAGE SKILLS

Mother tongue(s): Portuguese
