Leonardo Rebouças
React Javascript Developer

My main objective is to become a specialist in front-end development using javascript and ReactJs as a base, so that I can reuse a lot of my knowledge in web, mobile and even backend reducing my learning curve.

Work Experience

◆ **7COMm (04/2021 – Current)** - Front End React Developer
Creation of components using React and Redux, creation of wizard forms and customs steppers to navigate between the form's steps, creating Chat Bots, Custom tables with heavy business logic. Tutoring and helping juniors and internships. Creation of tables and graphs. Integration with Rest API. Creating and maintaining NPM packages for the client for better reusablility of componentes and utilities.

◆ **Paxico Technologies (10/2020–04/2021)** - Fullstack Javascript Developer
Creation of components using React and Redux creation of apis for consumption by the front. Development of video streaming applications using web RTC. (This job were remote and the company was based in California, US). US based company.

◆ **Freelancer (06/2019 –10/2020)** - Fullstack Javascript Developer
Development of REST APIs, using NodeJs, ExpressJs and MongoDB. Use of messaging services with NodoMailerJs, MailGun or SendGrid.

Education

◆ **Administration Technician**
bradesco foundation - Completion in 2020

◆ **System Analysis and Development Technician**
bradesco foundation - Completion in 2019

Awards

◆ **Honor to Merit EsIM (Military Instruction School)**
Better physical performance and clear conduct.

◆ **Best Project - CS Technician 2019 Fundação Bradesco**
Mobile Application NAVAN - Backend Development.
